plywood with a transparent and a semi-transparent coating

Unveiling natural beauty

Long life of plywood surface

Durability

Wearresistance

Extra protection

Two types of smooth coating

TRANSPARENT

A transparent and almost invisible protective film revealing the natural texture of the birch veneer.

OPAL WHITE

A semi-transparent coating with a sheer white tint that visually brightens an interior. Segezha ClearPly plywood is manufactured with two coating options: a transparent coating and a semi-transparent coating with an opal white tint.

plywood with a transparent and a semi-transparent coating

Different options of face veneer grades under coating: E, B, S, BB, CP Long/Short grain as per request

plywood with a transparent and a semi-transparent coating

Advantages for end-users

Wear resistance

Ready-to-use / Durability

Individual approach

Stability / Sustainability*

Our products are FSC® certified

Segezha ClearPly is easy to work with The coating remains smooth and seamless regardless of performed operations

Cutting

No film delamination,

cleaving, napping

Screwing & Furniture assembling

No film cracking after screwing Strong fixation of screw and furniture elements

COATING IS RESISTANT TO

scratches

		-	•

peeling

CNC and drilling holes

No film delamination after various **CNC** forms creation

Gluing

Absolutely compatible with all types of glueing No defects after glue removal

blistering

cracking

Proven durability

Suitable for severe conditions in both indoor/outdoor applications

Resistance to boiling water and steam

Changes in temperature and climate conditions

Lower water absorption

Color stability and resistance to UV rays

ClearPly vs typical UV lacquer

*All tests were conducted in R&D laboratories of coating materials

Customer service

Tongue and groove

Digital software control allows cutting plywood sheets in exact accordance with specified parameters.

The client receives an adapted set of sheets from plywood, ready to be assembled into a single structure.

Cutting-to-size

Cutting and CNC-processing according to customer's designs allows to adapt the finished product to individual customer projects. Preparation for fixtures

CNC

About the company

Sistema JSFC

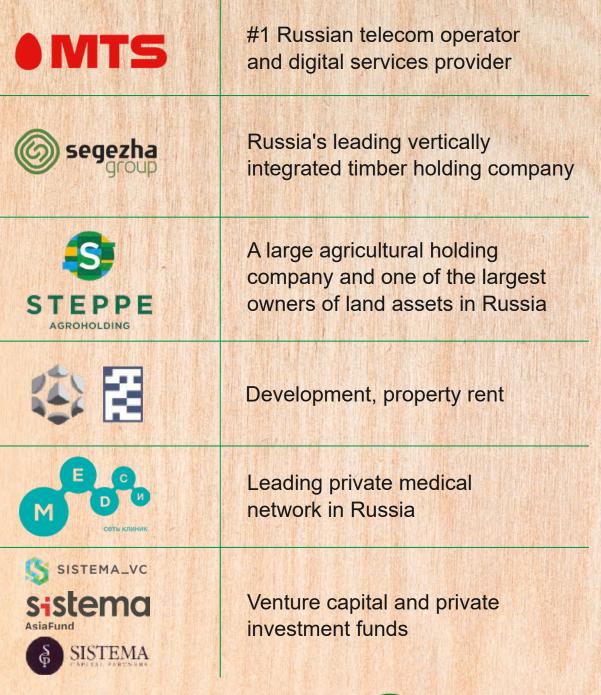

The largest public investment holding company in Russia A unique set of assets in various promising sectors of the Russian economy Investments and competencies in more than 15 industries

KEY FIGURES FOR 2019

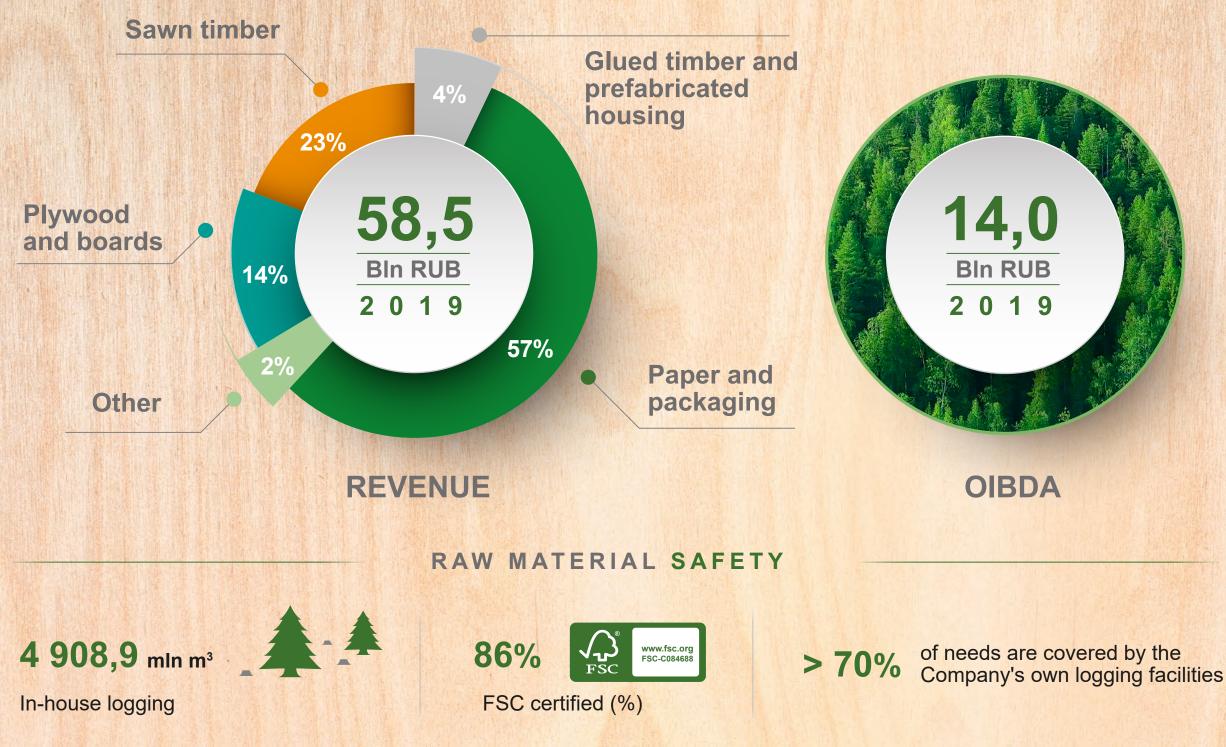

KEY ASSETS

A leading international wood and paper holding company

countries

Sales geography

Nº1 Nº2 in Russia in Europe by volume of paper sacks production

worldwide by volume of kraft paper production

Nº5

worldwide by volume production of large-size birch plywood

NO1 in Russia

by production volume of sawn timber and glued timber prefabricated housing

Sustainable production

REFORESTATION AREA

86% of Segezha Group's rental base is certified according to FSC international standards

Segezha Group performs reforestation on 100% of territories

Production waste is disposed of and used for the production of pellets and briquettes

The Company conducts specialized fire protection measures on the entire leased territory
